“Only 16% of executives believe their teams have the capabilities to deliver their digital strategy”

Deloitte survey 2018

Less than half (45 per cent) of executives are confident in their own digital skills and ability to lead their organisation in the digital economy, while just 16 per cent believe their talent pool has enough knowledge and expertise to deliver their digital strategy.

- 71% of CIOs report skill gaps will affect their business
- 75% of organisation will experience visible business disruption by 2020 caused by skill gaps
- 70% of employees have not mastered the skills they need for their jobs today
- 80% of employees do not have the skills needed for their current and future roles
- 51% of employees are actively looking for a new job
- The #1 risk facing organisations is talent shortage
- Only 2 in 10 organisations are taking tangible action with 100% recognising they need to

WHY PEOPLE QUIT

Source: Work Institute

STOP TRAINING EMPLOYEES IN SKILLS THEY'LL NEVER USE

The number of skills required for a single job is increasing by 10% year over year, and over 30% of the skills needed three years ago will soon be irrelevant, according to Gartner TalentNeuron™ data analysis on millions of job postings. The lack of digital skills is already apparent and the pace of change is leaving HR — and employees — playing catch-up.

The 2020 Gartner Shifting Skills Survey for HR Executives reveals that 60% of HR leaders report pressure from the CEO to ensure employees have the skills needed in the future. Three years ago, 69% of HR executives reported providing skill development opportunities.

REACTIVE: Nearly two-thirds of HR executives are addressing skill needs — and direction from the CEO to develop skills, and it's not always development as needs apply just 54% of the time.

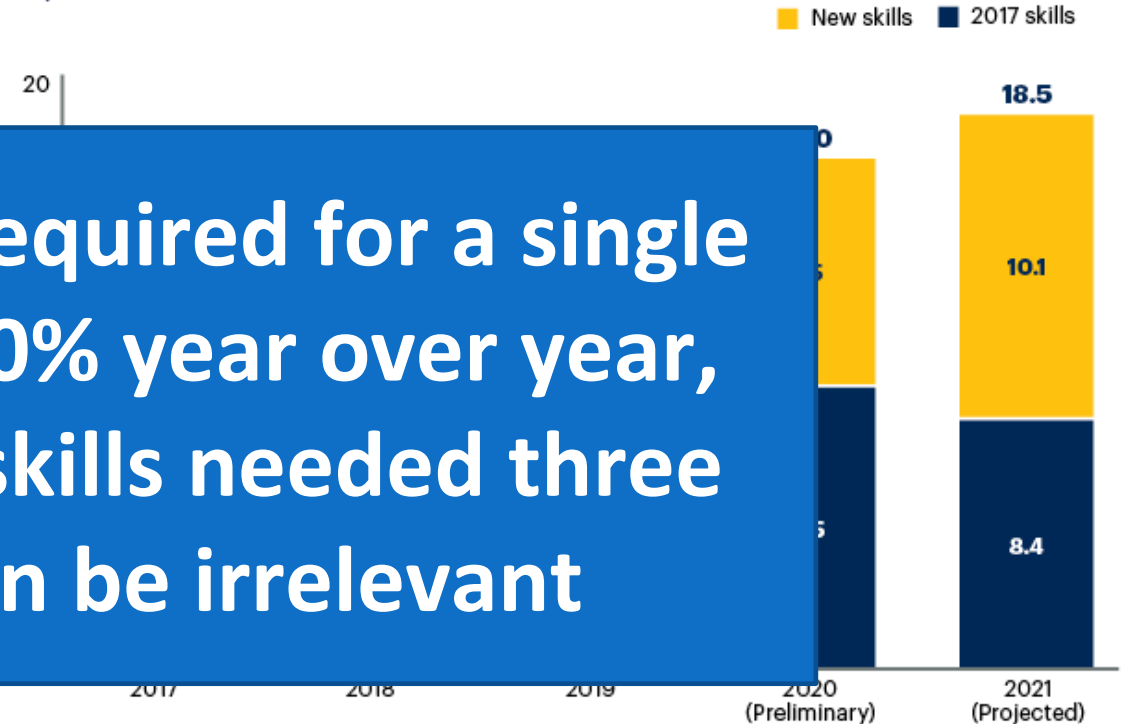

PREDICTIVE: It would be more effective. But that assumption is for the future. That also means development programs when times change rapidly. Research shows that with 54% of the new skills they learn.

DYNAMIC: The most effective HR functions use a dynamic skills approach focused on structuring HR and the organization — people, systems and strategies — to respond dynamically to changing skills needs. When HR uses the dynamic skills strategy, employees apply 75% of new skills learned.

The dynamic skills approach also boosts other key talent outcomes, resulting in a 24% improvement in employee performance and a 34% improvement in discretionary effort (where employees go above and beyond at work).

Average skills required per job posting

IT, finance and sales roles in U.S.

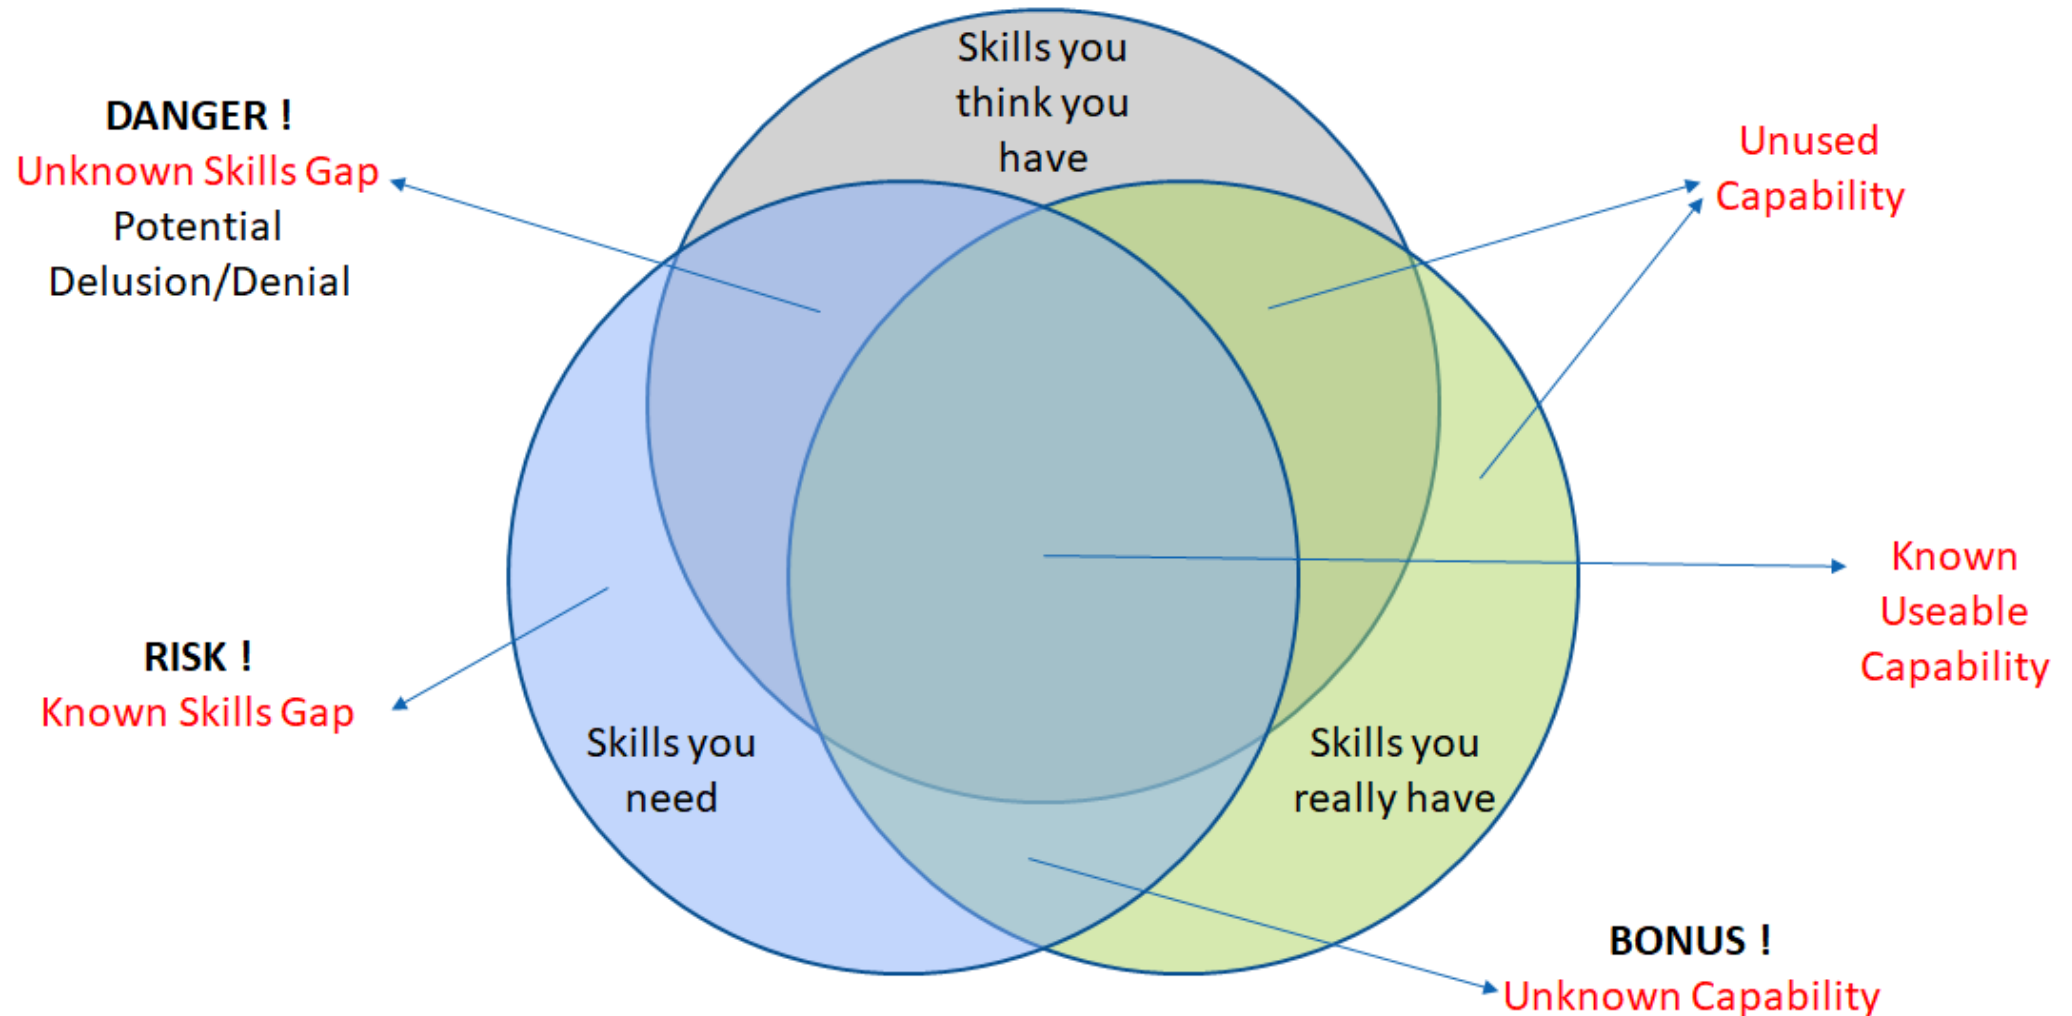

The number of skills required for a single job is increasing by 10% year over year, and over 30% of the skills needed three years ago will soon be irrelevant

Gartner

- Confirming the skills they have and the skills they need

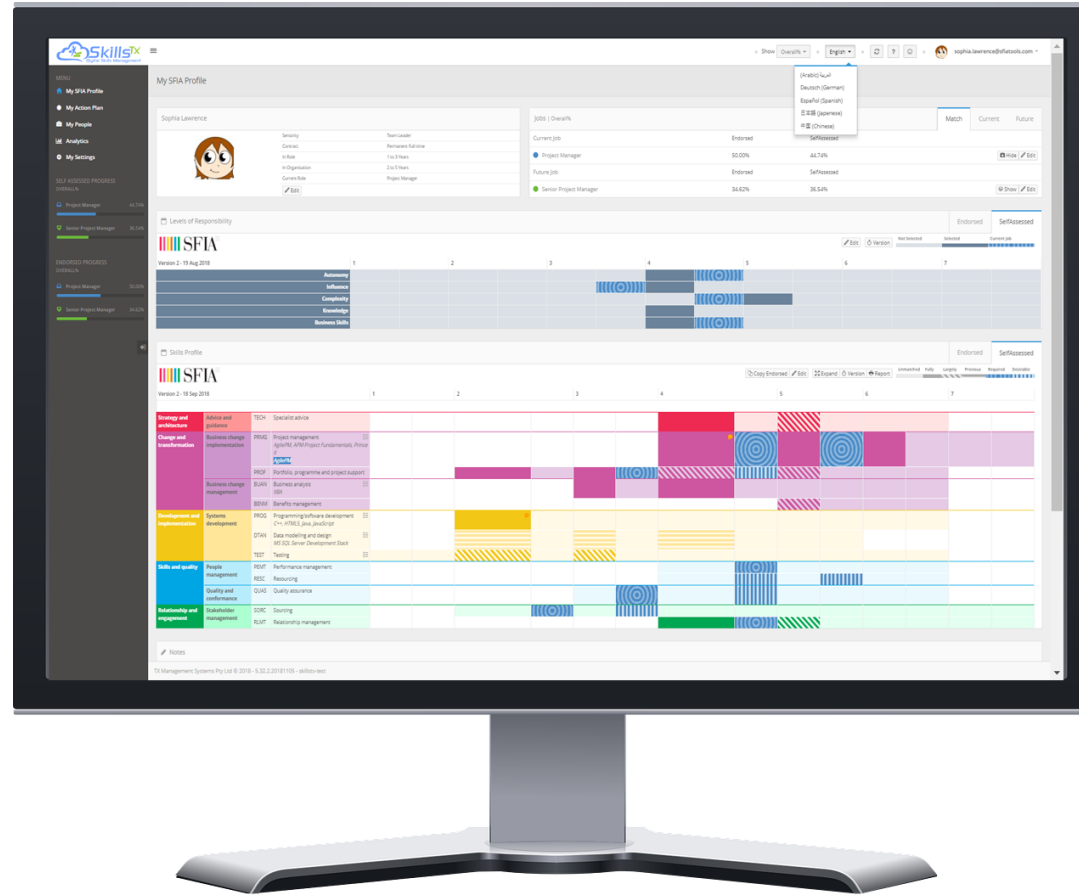

WHAT THE COMPANIES GETTING IT RIGHT ARE DOING

- Confirming the skills they have and the skills they need
- Using a common language to define and describe skills

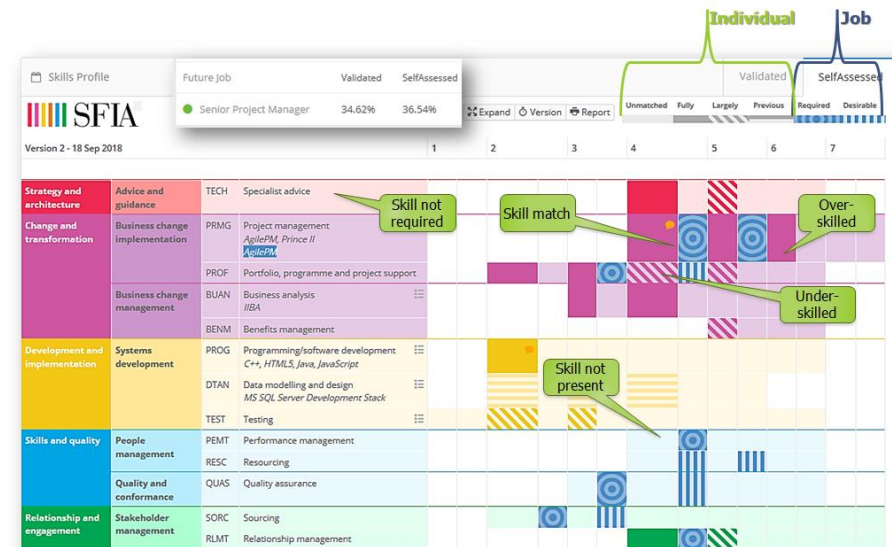

WHAT THE COMPANIES GETTING IT RIGHT ARE DOING

- Confirming the skills they have and the skills they need
- Using a common language to define and describe skills
- Taking an interest in their skills and experience
 - Not just the current job!

WHAT THE COMPANIES GETTING IT RIGHT ARE DOING

- Confirming the skills they have and the skills they need
- Using a common language to define and describe skills
- Taking an interest in their skills and experience
 - Not just the current job!
- Being transparent and clear about the skills needed
 - A clear view of the opportunity!

1. A consistent competency (skills) framework
2. Knowing what skills you have against the framework
3. Knowing what skills you need now and into the future
4. Skill Gap Analysis
5. Career development actions plans

WHAT ARE YOUR PRIORITY CHALLENGES?

- Does your organization have the right skills to:
 - Prevent data loss and **Cybersecurity** incidents?
 - Successfully complete **Digital Transformation**?
 - Operate your desired **Operating Model**
 - Deliver service** to agreed levels?
 - Integrate during **mergers and acquisitions**?
 - Recruit, retain and develop** talented individuals?
 - Ensure **compliance** with legislation and quality standards?
 - Improve **project success** and support **agile** operation
 - Gain competitive advantage in responding to technology change and **innovation**?

DIGITAL SKILLS MANAGEMENT MATURITY

1

Recognising the **need** for digital skills management and **starting** the journey

- You recognise Individuals should have an up-to-date and accurate skills profile
- And that Job/Position Descriptions and/or Role Profiles should accurately reflect the skills needed

2

Knowing the skills you **have**

- An accurate inventory of current skills
- Majority of individuals have skill profiles which include all their skills, not just the ones required for their current job or role
- Utilising an internationally recognised skills framework to ensure completeness and currency

3

Knowing the skills you have **AND** the skills you **need**

- Job Descriptions and Role Profiles are defined using the same skills framework
- Recruitment processes utilise skills descriptions and assessments
- Projects and business-as-usual skill requirements are expressed using the same skills framework
- Plus everything from level 2

4

Knowing the skill **gaps** and **risks** you **have**

- Majority of individuals can see the gap between current skills and required skills for current job and career paths
- Organisational management can pinpoint risks associated with not having critical skills at the right level, or single points of dependency
- Examples:
 - Information and Cyber Security risks which might cause a breach, adverse press attention, and an impact on customer retention, reputation and share price
 - Digital Transformation not being achievable due to lack of the essential skills to make the change and/or to operate in the new model
- Plus everything from levels 2 and 3

5

Knowing the skills you need to **recruit, develop, retain,** or **source** externally

- Majority of individuals have development action plans which address identified skill gaps and development targets against their future job
- Contractors, Contingent Workers, Service Providers and Suppliers are evaluated and selected based on skills, skill levels, and experience, using the same skills framework
- Plus everything from levels 2, 3 and 4

WHAT IS SFIA?

Skills Framework for the Information Age

Skills Framework for the Information Age VERSION 7

www.sfia-online.org

- Describes skills and competencies used by professionals in ICT, Digital, Software Engineering, Cybersecurity and other technology-related roles
- Globally accepted common reference model
 - Used in almost 200 countries
 - Used by governments, corporates, education, professional bodies, small businesses, and individuals
 - Available in multiple languages
- It's FREE!
 - Free for most non-commercial use
 - <http://www.sfia-online.org>
 - 2-minute overview video
 - <https://youtu.be/6io-T8NMhJw>

...including the suitability of design, testing, maintenance and management of an assessment framework. This involves making professional judgements on the appropriateness of the assessment methods, tools and techniques used. This involves making professional judgements on the appropriateness of the assessment methods, tools and techniques used.

Level 6
Leads assessments up to IEC 61508 Safety Integrity level 4. Determines assessment methods, tools and techniques appropriate to the integrity levels of the assessments undertaken.

Level 5
Participates in assessments up to IEC 61508 Safety Integrity level 3. Participates in safety analyses on initial design.

Digital forensics

SKILLS FRAMEWORK FOR THE INFORMATION AGE

- SFIA describes **professional skills**, so is recognised as a **skills** framework
- As SFIA has **experience** at the heart, it is also a **competency** framework
- **Knowledge** and relevant elements of recognised bodies of knowledge can be mapped to individual SFIA skills and responsibility attributes
- Qualifications, Certifications, Technical Knowledge, Tools & Methodologies, and Context can be mapped to SFIA
- Professionals skills are demonstrated through (and developed through) **experience**

WHO USES SFIA?

Individuals

- Assess skills
- Career planning
- Professional development
- Skills profiles / CV

Recruiters

- Job specification
- Interview questions
- Competency based selection

Line Managers

- People management
- Resource deployment
- Capability overview
- Job descriptions

Process Consultants

- Aligning process roles with skill requirements
- Role design and validation
- Assessing organisational skills gaps

Organisational Leaders

- Strategic capability planning
- Aligning capability and strategic plans
- Digital transformation
- Mergers/acquisitions

Procurement

- Comparing service providers
- Selection and Management of outsource service providers
- SFIA based rate cards

Human Resources

- Job descriptions
- Workforce planning
- Career pathways
- Organisational performance

Professional and Industry Bodies

- Alignment of bodies of knowledge
- Membership/certification assessments
- Professional development

Learning & Development

- Development outcomes
- Blending learning solutions
- 70/20/10 Development

Education Sector

- Align courses to employer/employee needs
- Alignment to global standards
- Support development evaluation

SFIA GENERIC LEVELS OF RESPONSIBILITY

- 7 levels of responsibility
- 5 characteristics / attributes of generic responsibility, each described at 7 levels

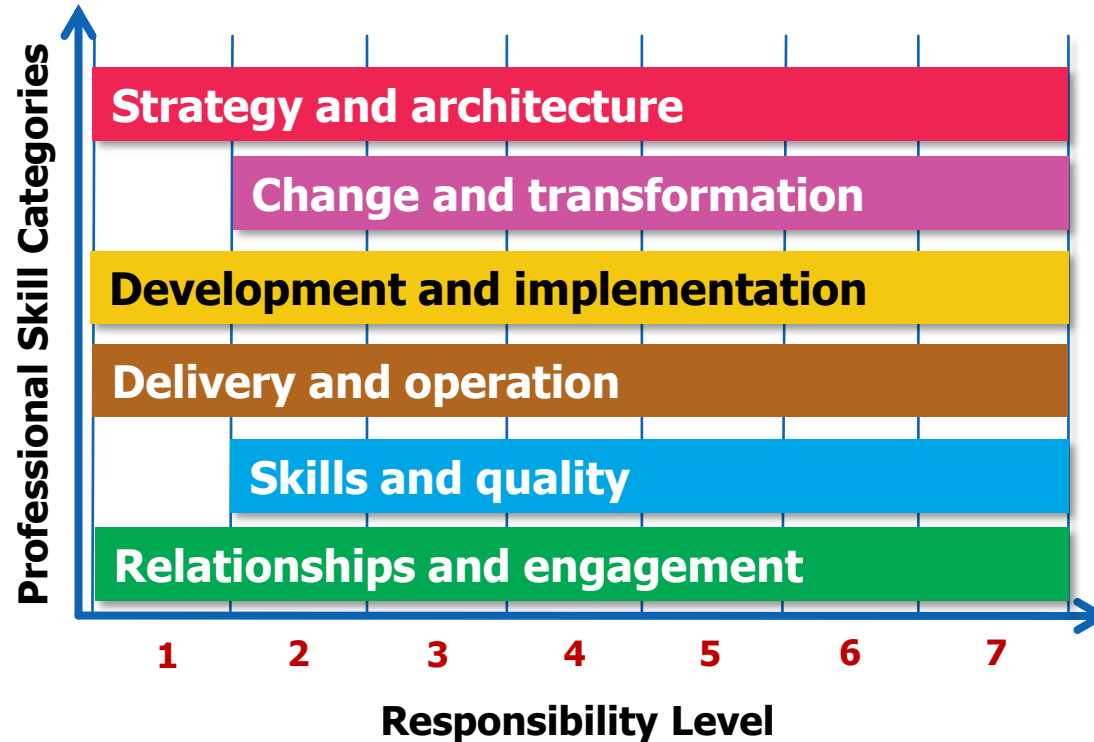

Level 7	Set strategy, inspire, mobilise
Level 6	Initiate/influence
Level 5	Ensure/advise
Level 4	Enable
Level 3	Apply
Level 2	Assist
Level 1	Follow

Follow	Autonomy	Works under supervision. Uses little discretion. Is expected to seek guidance in unexpected situations.
	Influence	Minimal influence. May work alone, or interact with immediate colleagues.
	Complexity	Performs routine activities in a structured environment. Requires assistance in resolving unexpected problems.
	Knowledge	Has a basic generic knowledge appropriate to area of work. Applies newly acquired knowledge to develop new skills.
	Business skills	Has sufficient communication skills for effective dialogue with others. Demonstrates an organised approach to work.
Level 1		<p>Uses basic systems and tools, applications, and processes</p> <p>Contributes to identifying own development opportunities.</p> <p>Follows code of conduct, ethics and organisational standards. Is aware of health and safety issues.</p> <p>Understands and applies basic personal security practice.</p>

THE STRUCTURE OF SFIA

- 102 skills, each described at up to 7 levels
 - 390 skill-level descriptions
- Grouped into 6 categories

TYPICAL IMPLEMENTATION FLOW

What skills do we have?

What skills do we need?

Using our FREE SFIA self-assessment you can create your own Digital CV/Resume, compare your skills with over 400 sample roles, and maintain your own Development Action Plan

**Organizations also have access to these as sample roles in their SkillsTx SaaS instance
The roles can be edited to reflect their unique requirements or used as-is, and are mapped to SFIA**

These sample jobs/roles have been created by:

UK Government Digital, Data and Technology Profession Capability Framework
Digital, Data and Technology (DDaT) roles in government and the skills needed to do them.
The SFIA Foundation have published the mappings of these roles to SFIA.

The European Union has published 30 ICT professional role profiles as part of the e-CF activity
EU ICT Professional Role Profiles
CEN: CWA 16458-1:2018 European ICT Professional Role Profiles – Part 1: 30 ICT Profiles.
The SFIA Foundation have published the mappings of these roles to SFIA.

Australian Public Sector Digital Career Pathways

The APS Digital Career Pathways dataset contains the role definitions for typical roles in the Australian Public Service (APS). You can use these definitions to determine potential career pathways and identify skills gaps in digital disciplines in the APS. These are all mapped to SFIA. This product is based in part on the digital career pathways data developed by the Australian Public Service Commission and the Digital Transformation Agency and published on data.gov.au.

The US Government NIST (National Institute of Standards and Technology)

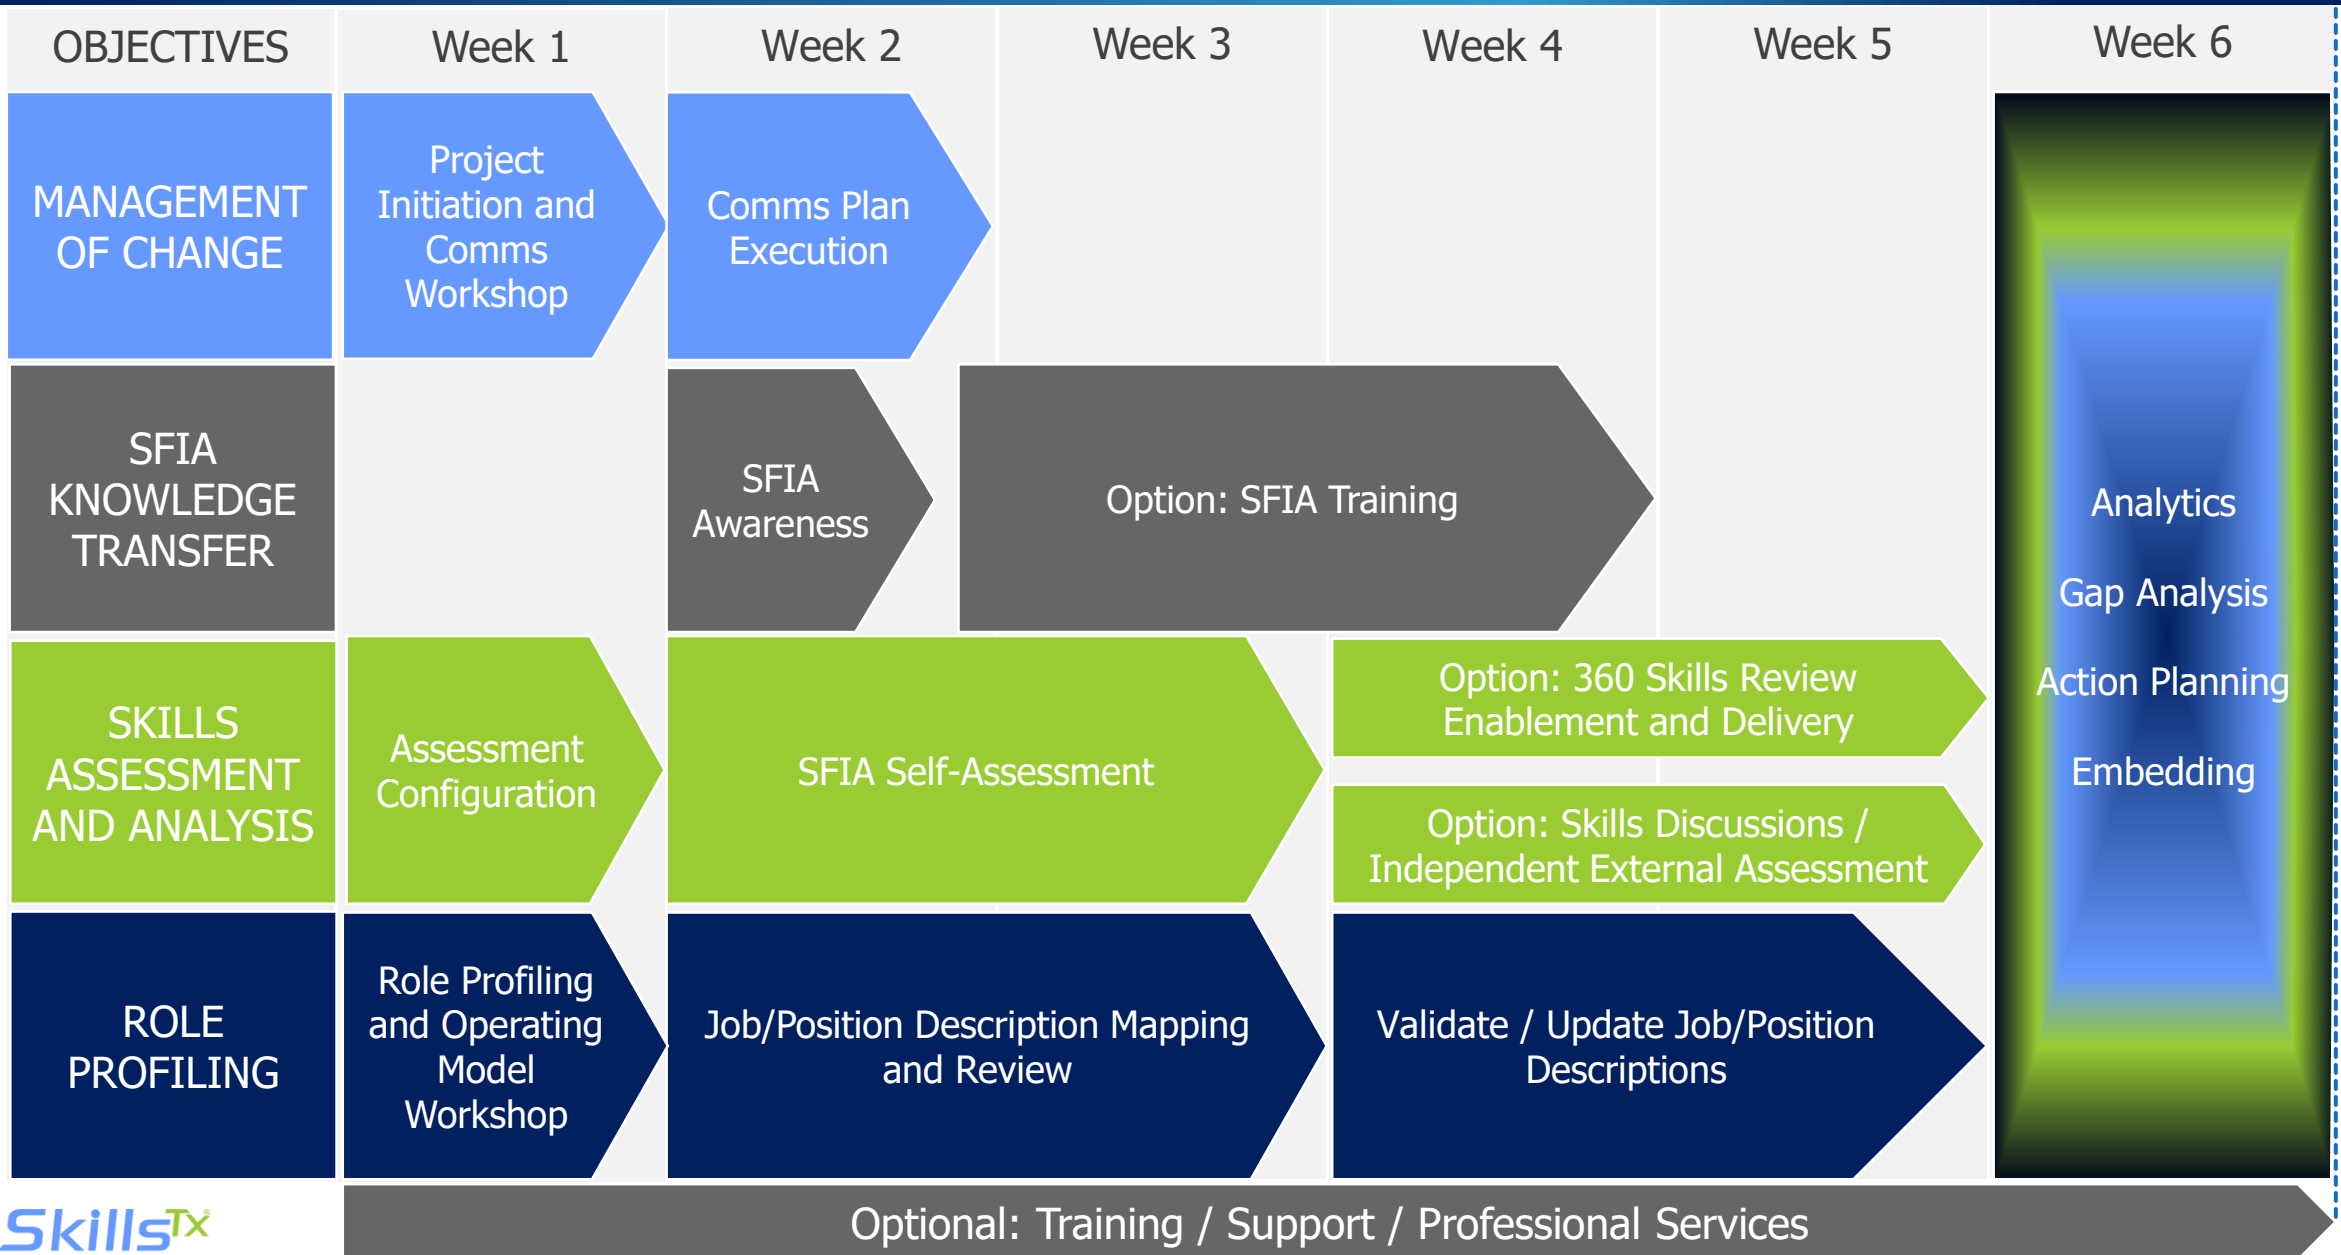

52 information and cyber security roles from NICE (National Initiative for Cybersecurity Education) CWF (Cybersecurity Workforce Framework) published by NIST
The SFIA Foundation have published the mappings of these roles to SFIA.

— Digital Skills Framework —

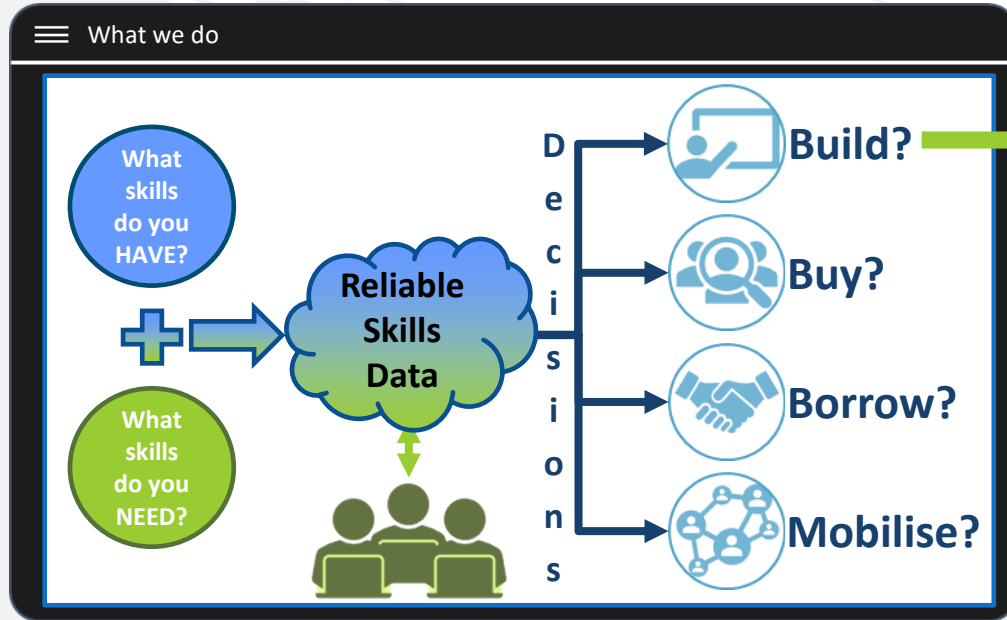

Different skills, **single future**

The Digital Skill Framework (DSF) is a framework for defining ICT skills built based on SFIA Skills Framework for the Information Age, a framework for defining ICT skills around the world. With the expansion of the ICT industry, the need to develop and manage ICT skills has grown. To be able to develop these skills efficiently and assess them accurately, we first need to define them properly. DSF has recognized this need, and has developed a framework that identifies skills in ICT and supporting fields, defines them, and rank associated levels of responsibility for each skill. The framework identified 102 skills, and 7 different possible levels of responsibility. An individual possesses a skill-based on their ability to apply this skill in a real-life situation, not based on academic qualification or professional certification. These may help an individual gain a skill, but they are not the only way to gain DSF skills, nor are they

TYPICAL SFIA PROJECT

1. Assess the whole individual – not just the skills of the current role
2. Capture all the levels of the skills - people often practice skills at multiple levels
3. Recognise that skill selection isn't always binary. i.e. not as simple as "you either have the skill or you don't"
4. Ensure you assess the Levels of Responsibility (LoR) characteristics (Autonomy, Influence, Complexity, Knowledge and Business Skills) as well as the professional skills

Assess skills

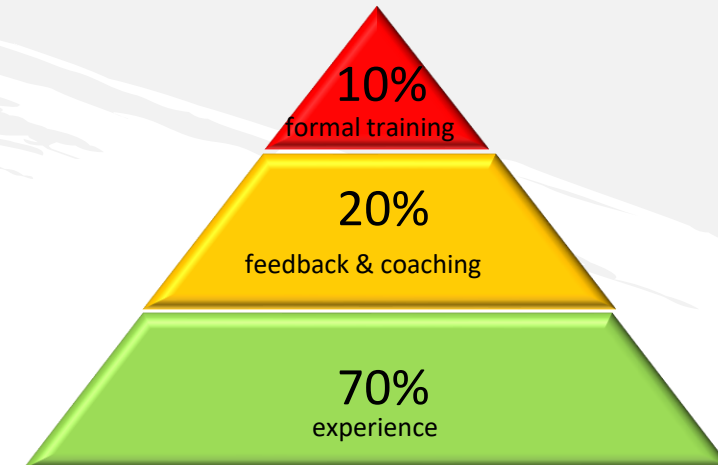

Define jobs/roles

Empower employees

Enable decision making

- Upskilling actions from any source:

DEVELOPMENT ASSESSMENT – FINDING THE SKILLS YOU NEED

Sophia has developed an Action Plan for her Professional Development based on the Skill Gaps automatically highlighted between her self-assessed profile and the Jobs she has selected

My Action Plan

Skills Gap: Focused | All

Profile Focus: SelfAssessed

Job Focus: Current - Project Manager

Change and transformation

Business change implementation

Skill	Description	Has Plan	Done
Portfolio, programme and project support (PROF)			
PROF4	Takes responsibility for the provision of support services to projects. Uses and recommends project control solutions for planning, scheduling and tracking projects. Sets up and provides detailed guidance on project management software, procedures, processes, tools and techniques. Supports programme or project control boards, project assurance teams and quality review meetings. Provides basic guidance on individual project proposals. May be involved in aspects of supporting a programme by providing a cross programme view on risk, change, quality, finance or configuration management.	⊖	⊖

Skills and quality

People management

Skill	Description	Has Plan	Done
Resourcing (RESC)			
RESC4	Implements resource plans, including conducting recruitment interviews. Facilitates selection, assessment and on-boarding processes, and internal resource allocation. Contributes to transitioning of resources, complying with relevant statutory or external regulations and codes of good practice.	✔	⊖
RESC5	Develops plans to ensure that the organisation has appropriately skilled resources to meet organisational objectives and commitments. Manages the effective implementation of resource planning, recruitment, selection, assessment, on-boarding and transitioning of resources. Advises on standards, methods and tools for resource management. Ensures compliance with relevant statutory or external regulations and codes of good practice. Contributes to the development of resource management policies, standards and guidelines and to audits and assessment of resource management processes.	✔	✔

Quality and conformance

Skill	Description	Has Plan	Done
Quality assurance (QUAS)			
QUAS3	Contributes to the collection of evidence and the conduct of formal audits or reviews of activities, processes, data, products or services. Examines records for evidence that appropriate testing and other quality control activities have taken place and determines compliance with organisational directives, standards and procedures. Identifies non-compliances, non-conformances and abnormal occurrences.	✔	⊖
QUAS4	Conducts formal audits or reviews to ensure compliance with organisational standards for activities, processes, data, products or services. For projects, development or support activities; plans, organises and conducts audits and determines whether appropriate quality control has been applied. Collates, collects and examines records, analyses the evidence and drafts all part of formal compliance reports. Determines the risks associated with findings and non-compliance and proposes corrective actions. Provides advice and guidance in the use of organisational standards. Performs quality assurance reviews of suppliers and throughout the supply chain.	✔	⊖

Relationship and engagement

Stakeholder management

Skill	Description	Has Plan	Done
Sourcing (SORC)			
SORC2	Assists in preparation of pre-qualification questionnaires and tender invitations in response to business cases. Assembles relevant information for tenders. Produces detailed evaluation criteria for simple tender criteria. Assists in evaluation of tenders.	⊖	⊖
SORC3	Prepares pre-qualification questionnaires and tender invitations in response to business cases. Recognises the difference between open source and proprietary systems options. Produces detailed evaluation criteria for more complex tenders and assists in evaluation of tenders.	⊖	⊖

QUESTIONS?

THANK YOU

Matthew Burrows
matthew.burrows@skillstx.com
[@MatthewKBurrows](https://twitter.com/MatthewKBurrows)

- What do we do?
 - We help answer the **What skills do we have** and **What skills do we need** questions, and embed data-driven **Digital Skills Management**
 - We do this through a mix of **SaaS**, **Supporting Services** and **Professional Services**
- Why is it important to you?
 - People, their skills and experience, have become a critical aspect for the operations of companies with a dependency on Information & Communications Technology.
 - Most companies don't know the current skills of their Digital, Cybersecurity and ICT Workforce, or what they need short, medium or long term
 - Without this, there is significant risk of **visible business disruption, cybersecurity breach, digital transformation and project failure, compromised ability to deliver products and services to customers at agreed levels, poor employee engagement, recruitment and retention, ineffective training and development**

SkillsTx – WORLD #1 SFIA TOOL AND WORLD #1 SFIA PROFESSIONAL SERVICES

- SkillsTx is a collaboration between one of the foremost experts in SFIA world-wide (BSMimpact) and the leaders in online assessments (Tx Management Systems).
- Representation on the SFIA Council, SFIA Global Design Authority & Project Board for SFIA updates
- Most experienced team of SFIA Accredited Consultants worldwide
- Deliver more SFIA Accredited training worldwide than any other SFIA Partner
- Established in 1998
- Operating companies based in UK, Australia, and USA
- Professional Services resources in all geographies

Professional Services

Unrivalled expertise and experience from our international team of SFIA Accredited Consultants and Trainers

Supporting Services

Training and common services that our customers often ask for to support the adoption and on-going use of SFIA

SkillsTx SaaS

Software-as-a-Service solution enabling data-driven Digital Skills Management
